

## ABSTRACT

A device, a system, a computer readable medium and a method provide status information of a device and/or devices in a short distance wireless network in an embodiment of the present invention. Status information, such as the quality of the received signal and/or available battery power of each device in the short distance wireless network is provided to a device having a display according to an embodiment of the present invention. Status information may be selectively displayed in an easily viewable and preferable type in an embodiment of the present invention.
